Dear [REDACTED]

25X1A9a

Our trustees were so much impressed by your talk at our Anniversary Meeting on November 21 that many of them have expressed the hope that the substance of what you said might be published in some manner not offensive to security.

To this end, I am enclosing a transcript of the proceedings in the hope that you will indicate how much of your part of it might be published. I am writing similar letters to other participants, and trust that all of you will be as generous as you can in letting this material be used.

I hope you will agree that such publication will be greatly in the public interest as anything we can do towards public enlightenment in these days of many doubts is much to be desired.

We were most grateful for your challenging contribution to the November 21 proceedings.
